

STORSERVER PRODUCTS AND SERVICES

CONVERGED DATA PROTECTION

Protect physical and virtual environments. Save money and time by taking only minutes per day to manage.

CLOUD BACKUP

Provide multiple architectural options for cloud disaster recovery, as well as direct to private or public cloud services for automated backup, archive and disaster recovery.

IBM SPECTRUM PROTECT PLUS

Simplify virtual machine data protection with highly efficient data storage and deduplication capabilities. Utilize instant search and recovery of virtual machines, databases and files.

SIMPLIFICATION

Eliminate the need to learn and manage multiple backup products, saving valuable time and resources. Rely on one source to provide secure, reliable and scalable data protection.

LOWER TOTAL COST OF OWNERSHIP

Work with a single vendor to simplify the design phase, streamline implementation and provide one US based customer support team to answer your questions

STORServer Backup Appliance

- Sized from entry level to enterprise, STORServer Backup Appliances are fully integrated, award winning solutions for backup, archive and disaster recovery.
- Pre-built, pre-configured and pre-tested appliance solutions ensure ease of installation and deployment and come with certified support.
- Configuration Options:
 - A Series
 - * Entry level data protection that is fully scalable for future growth as needed
